

Over the past decade we have seen, with tragic results, how natural disaster and reckless acts of violence can impact nearly any college or university campus. It has become evident that just having an emergency management plan is not enough. To ensure safety and effectively address emergency situations, higher education institutions need a complete system that engages and integrates students, administration and emergency response teams.

BeSafe - the leading emergency response system, facilitates clear communications between college resources and emergency first responders, providing critical information about an entire campus.

BeSafe delivers accurate and detailed information including floor plans, building demographics and any unique features found on campus, and places this information directly in the hands of police, fire, SWAT and other emergency teams. In the event of an emergency, information is instantly accessible so critical decisions can be made quickly and effectively.

Having an emergency management plan is not enough. Colleges and Universities need a proactive system that connects, educates and empowers students, the administration and emergency response teams.

Components

BeSafe is a Proactive Emergency Response System consisting of these main components:

- Site Visits to Gather and Verify Info.
- Emergency Contact Information
- Utility, Building and Maint. Info.
- Demographics of Building Occupants
- HAZMAT Information
- Exterior Entrances and Exits
- Areas with High Safety Concerns
- Unique Building Features
- Hydrants and Generators
- Aerial Photos / Pre-Recorded Video
- Door, Window, Stairway and Crawlspace Locations
- Utilities (Water, Electric and Gas)
- Fire Alarm, Control Panels and Sprinkler Systems
- Interior and Exterior Cameras
- Roof Access Information

The BeSafe Safety Portal:

- Secure Document Management and Publication
- Essential Information Management
- Content Management
- User and Group Management
- Event Planning
- Announcements
- Discussion Forums
- BeSafe Information for First Responders
- Custom Functionality

Key Features

- Quick to implement and easy to use
- Available via Internet, CD, USB and Hard Copy
- Customized to any facility
- Secure, confidential and fast
- Updated yearly with new facility details
- Peace-Of-Mind and assurance against the unthinkable

"Having the BeSafe program in place gives us a state of the art safety blanket for our students, faculty and staff. It has also given our parents an added level of assurance that their children's safety is of paramount concern to our school."

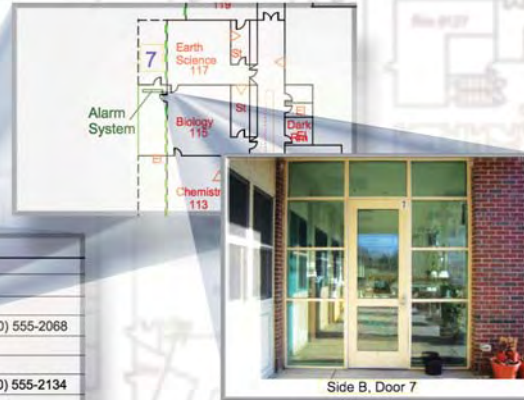

- **Tim Dumont, Director of Buildings and Grounds**
The Groton School
Groton, MA

	Outside Door 1
	First Floor only
	Safety First Co (800) 555-2134

Enhanced Floor Plans

Data Collection

Benefits

Administration	BeSafe enables college and university administrators to efficiently distribute accurate, up-to-date building information to all first responders that is essential to protecting students, faculty, and staff.
Fire:	BeSafe gives fire personnel access to critical information, even before they arrive onsite, such as number of occupants, locations of hazardous materials, utility shutoffs, emergency contact data, and alternate approaches if primary routes are blocked.
Police:	BeSafe gives police an on-demand detailed understanding of buildings they may not be familiar with. Having instant access to floorplans and digital photos, officers can quickly determine the safest routes to any area of the building.
EMTs:	BeSafe equips EMTs with the information they need to identify the most direct path to accident and emergency locations. Knowledge of windows and roof accesses improve EMTs ability to respond to changing conditions in an emergency.
State/Local Government Agencies:	BeSafe enables multiple municipal and state agencies to provide coordinated responses to emergencies on campus. All first responders are looking at the same data and can effectively communicate and work together.

About BeSafe

BeSafe Technologies, Inc. delivers **BeSafe®** a proactive emergency response system serving K-12, Higher Ed, Corporate, Housing and Government. Endorsed by police, fire, EMT, SWAT and other emergency response personnel, BeSafe enables first responders to make critical, life-saving decisions with immediate access to crucial information about any facility. With more than 1,000 customers, BeSafe is redefining how schools, businesses and communities are prepared and protected.
